

Solution Requirements

Date	30 September 2026
Team ID	SWTID-2026-3326
Project Name	Blog Nest
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Functional Requirements

1. User can register and login.
2. User can create blogs.
3. User can edit and delete blogs.
4. User can read and search blogs.
5. User can like and comment on blogs.
6. Admin can manage users and blogs.

Non-Functional Requirements

1. Website should be **fast**.
2. Website should be **secure**.
3. Website should be **easy to use**.
4. Website should work on **mobile and desktop**.
5. Website should be **reliable**.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely register, log in and log out of the Blog Nest system..	High
2	Authorization levels	<i>Users can create, edit and delete their own blogs, while the admin can manage users, blogs and comments.</i>	High
3	External interfaces	<i>The system can use Cloudinary for blog and profile image storage</i>	Medium

4	Transactions processing	The system processes blog creation, updating, deletion, likes and comments and stores the related data in the database.	High
5	Reporting	Admin can view basic information about users, blogs and comments through the dashboard	Medium
6	Business rules, etc.	Only authenticated users can create blogs, and users can edit or delete only their own blog posts.	High
7	Compliance to laws or regulations	User information and login credentials must be handled securely and user privacy must be protected.	High
8	<i>Other</i>	Users can search blogs, browse categories and interact with published blog content.	High

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	<i>Pages and user actions should respond quickly.</i>	<i>Page loads within 2–3 seconds under normal usage.</i>

2	Scalability	<i>The system should support increasing users and comments.</i>	<i>Support at least 100 concurrent users initially.</i>
3	Security & Data Privacy	<i>User credentials and personal information should be protected</i>	<i>Passwords securely hashed; authenticated access required.</i>
4	Reliability & Availability	<i>The application should remain available properly.</i>	<i>Target 99% availability during normal operation</i>
5	Usability & Accessibility	<i>The interface should be simple, responsive and easy to navigate.</i>	<i>Works properly on desktop, tablet and mobile screens.</i>
6	Other	<i>The application code should be modular and easy to update.</i>	<i>Clear separation of frontend, backend and database components.</i>
