

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-3326
Project Title	Blog Nest
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The **Blog Nest** project aims to provide a simple and user-friendly blogging platform where users can create, publish, read and interact with blog content. It addresses the difficulties users face in finding a simple platform for creating and discovering blogs. The system provides organized blog management and user interaction features.

Project Overview	
Objective	The primary objective is to develop an easy-to-use blogging platform that allows users to create, publish, search, read and interact with blog posts efficiently
Scope	The project covers user registration and login, blog creation and publishing, blog search and categorization, viewing blog posts, editing and deleting blogs, likes and comments, and basic admin management.
Problem Statement	
Description	Many users, especially beginners, face difficulties when using complex blogging platforms to create, manage and discover relevant blog content. There is a need for a simple and organized platform that makes blogging easier for both content creators and readers.
Impact	Many users, especially beginners, face difficulties when using complex blogging platforms to create, manage and discover relevant blog content. There is a need for a simple and organized platform that makes blogging easier for both content creators and readers..
Proposed Solution	
Approach	Blog Nest will provide a centralized web-based platform where users

	can register, create and publish blogs, browse blogs by category, search for relevant content, and interact with posts through likes and comments.
Key Features	⌚ User registration and login. ⌚ Create and publish blog posts. ⌚ Edit and delete personal blogs. ⌚ Search and browse blogs by categories. ⌚ Like and comment on blog posts. ⌚ User profile management. ⌚ Admin dashboard for managing users and blogs

	- Real-time decision-making for quicker loan approvals. - Continuous learning to adapt to evolving financial landscapes.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Python frameworks	Flask
Libraries	Additional libraries	scikit-learn, pandas, numpy, matplotlib, seaborn
Development Environment	IDE	Jupyter Notebook, pycharm
Data		
Data	Source, size, format	Kaggle dataset, 614, csv

		UCI dataset, 690, csv
